Get the aesthetic beauty of wood and all the advantages of plastic

Product Advantages

It's all your waste plastic turned into something useful and innovative.

Kedel recycled plastic wood, decking, cladding, planks and other profiles are the ideal alternative to traditional building materials.

- ◆ Maintenance free
- ◆ Uniform dimensions
- ◆ Consistent - no knots, splits or splinters
- ◆ UV stable and insect resistant
- ◆ Impervious to water and resistant to algae
- ◆ Does not crack, chip or break
- ◆ Requires no toxic preservatives
- ◆ Handles like wood - can be sawn, drilled, nailed, screwed, glued and stapled

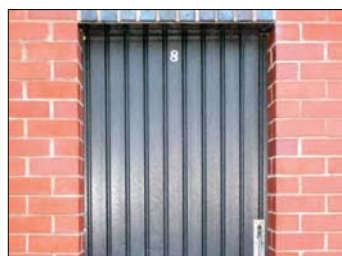

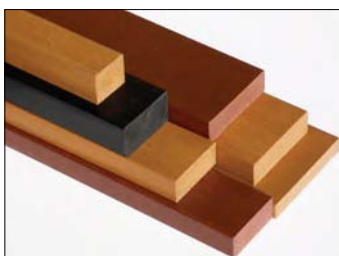

British Innovative Recycling Technology

Our synthetic wood is made from high density polystyrene derived from waste plastic destined for landfill or incineration.

ALL our products are made from waste plastic collected from UK homes and businesses.

We do not import plastic from Asia which has a huge carbon footprint due to transportation.

- ◆ A surprisingly wood-like feel and appearance
- ◆ 100% Recycled
- ◆ 100% Recyclable
- ◆ Releases 250% less CO₂ into the atmosphere during manufacture than virgin plastic
- ◆ Payback in 2-4 years
- ◆ 5 year guarantee

SKU CODE	SUGGESTED APPLICATIONS	DIMENSIONS		
		WIDTH (mm)	DEPTH (mm)	LENGTH (m)
CLADV0001	Open V-Cladding - Cladding	110	16	3.6, 4.8
WANYTP0001	Tapered Waney Lap - Fencing panels, Cladding, Shed roofing and side walls - tapers from 15mm down to 7mm	150	tapered from 15 to 7	3.6
