

Maintenance-Free, Outdoor Classroom Eco-Collection

Made from 100% British Recycled Plastic.

Your Own Industrial Design Team

Kedel specialise in developing exclusive and bespoke childrens outdoor classroom furniture ranges in 100% British recycled plastic. Whether it's a one off design, or a full scale production range, with the aid of the most up to date CAD Software (Computer Aided Design) and state of the art CNC (Computer Numerically Controlled) cutting and drilling machinery, our industrial design team will help bring your ideas to life.

What we can offer

From our KitchenPhonics range to Deluxe Raised Beds, Kedel offer a stunning range of maintenance-free outdoor classroom products, that act as teaching aids to stimulate brain development and learning.

The Value of Outdoor Experience

Teachers have told us that children learn much faster from the stimulating experience of playing outdoors. Recent research found that in the early years a child's brain makes 24 million new connections every minute. In fact, 70% of brain connections change every day from 'new experience'.

Take our Mini-Beastie Box

It's a wonderful teaching aid, providing a wealth of varied experiences and means of engagement. It demonstrates the cycle of life, and being made of recycled plastic, shows how we recycle too. The children count the Insects, learn more about them, experience working together to grow flowers and vegetables, observe the behaviour of different birds, and thrill at the magic of butterflies emerging from a chrysalis.

“The outdoor classroom environment sparks the children's imagination... they learn social skills working together on activities... it has cross curriculum value. The biggest impact is being seen in writing and maths, and as a result we had our best SATs scores ever.”

Ann Flannery, Head of Eatock Primary School

Why Recycled Plastic?

- It's maintenance-free—no toxic preservatives
- Hygienic and easy to clean, including graffiti paint and felt tip.
- Can be left out in all weathers, all year round
- Lasts at least 5 times longer than wood
- Better value for money

It's Your Plastic Waste

We use the waste plastic collected from your doorstep. We don't import recycled plastic from halfway around the world. Using British Recycled Plastic means less pollution from transportation, a lower Carbon Footprint and real Eco-friendly value.
